The Organiser cordially invites abstracts and full length research/review papers from all over the world to participate in the **International Conference on “Advances in Materials, Manufacturing, Mechanical, Mechatronics and Energy (ICAM4E - 2025)**. This conference is concerned with application and fundamental research of latest advancement in Materials, Manufacturing, Mechanical, Mechatronics and Energy. The objectives of this conference are to explore the experimental, theoretical, and scientific data analysis foundations of Materials, Manufacturing, Mechanical, Mechatronics and Energy studies. This conference provides the most beneficial platform to strengthen materials

and energy related skills and opportunities with an ideal flow of knowledge and information between industrialists, scientists, academicians, researchers, educational administrators, and policymakers. This conference is concerned with theoretical modeling & scientific developments as well as applications of existing technology to new domains. To this end, the meeting aims to attract participants with different backgrounds, to foster cross-pollination between different research fields, and to expose and discuss innovative theories, methodologies, tools, and applications for sustainable development. All contribution should be of high quality, original and not published elsewhere or submitted for publication. During the review period, papers will be reviewed by eminent scholars in the respective areas. The selected papers will be published in ESCI (WoS) Indexed Journals, Nano Hybrids and Composites; and Journal of Polymer and Composites along with Scopus Indexed Journals; Defect and Diffusion Forum, Solid State Phenomena, Materials Science Forum, Key Engineering Materials, Advances in Science and Technology after peer review by review and editorial committee with additional APC.
